

Concrete Form Plywood

Product Code: PLYCON

Manufacturer: Made in Canada

Dimensions: -

Weight: -

Price: [Contact Seller for Pricing](#)

Description

Concrete Form Plywood is Douglas Fir panel overlaid on one or two sides with a medium density phenolic resin impregnated fiber sheet.

Medium Density Overlay MDO

- Made with 7 plies of Douglas Fir veneer
- Greater strength and stiffness in wet service conditions
- Waterproof glue that will not delaminate
- Cross-laminated veneers make the panels splitproof from nailing as well as tough and durable
- Multiple reuses when professionally handled with respect to fabrication stripping, cleaning and release agent retreatment
- Factory applied edge-seal and the chemically active release agent
- Smooth uniform concrete finish
