

Standard MDF

Product Code: MDFSTD

Manufacturer: Made in Canada

Dimensions: -

Weight: 2.00 pounds

Price per Unit (piece): \$25.00

Availability: For Export Only

Description

MDF is a uniform density panel with a fine and smooth surface ideal for shaping and routing. MDF can be easily painted, cut, machined and cleanly drilled without splintering or chipping.

MDF is an engineered waste-wood product manufactured from pine fibre and resin compacted together, which makes it surface-free of knots and grains that can make finishing difficult and time consuming.

Code	Type	Description
E2	Standard	Standard
E1	Low Emission	Low Formaldehyde
E0	Zero Emission	Free Formaldehyde

Attributes

Size: ,1220x2440mm
